

Table S1

Intercorrelations between variables in the model: Pearson's r (N = 1318)

	1	2	3	4	5	6	7	
1. Eating disorder symptoms	1	.57*	.40*	.41*	.43*	.56*	.27*	
2. Orthorexia nervosa symptoms		1	.23*	.20*	.30*	.42*	.39*	
3. Family pressures			1	.40*	.31*	.21*	.04	<i>Sociocultural pressures, body ideals, and disordered eating in young women</i>
4. Peers' pressures				1	.42*	.29*	.08	
5. Media pressures					1	.40*	.16*	
6. Internalization – Thinnes						1	.42*	
7. Internalization – Muscularity							1	

Note. * $p < .01$.
